

Thai food is more popular than ever in the United States... not just among Asian visitors, but also with a growing number of native born Americans. The healthy diet, typified by fresh meat and vegetables, along side with unique seasoning and ingredients, like coconut milk, fish sauce, and curry paste, make for ever growing popularity of restaurant choices.

The Little Thai Restaurant serves Eastern, Northern, and Southern Thai selections. We suggest choosing different meal and trying each different dish, in a family style presentation. Sample meal and share!

You'll want to come back!
